ANDERSEN International School

Pre-Kindergarten & Kindergarten Projects

A JOURNEY OF DISCOVERY, MOVEMENT, and EMOTIONAL GROWTH

Pet Therapy

A gentle experience for young children, fostering empathy, confidence, and emotional connection through guided interaction with animals.

Psychomotor Skills

For Pre-School and Year 1 students, movement and structured play support motor, cognitive and emotional development, strengthening body awareness, coordination and self-expression.

Our Emotional Journey

Through stories, games and creative activities, children learn to recognise and express their feelings while developing empathy and positive relationships. This project builds the emotional skills they need to grow happy, confident and caring.
